

## Astrology Newsletter and Current Topics

As I have been sharing over the years, astrological energies have been intensifying and have a direct effect on humanity; influencing our minds, emotions and bodies. From June 2020 through January 7, 2021 the planet Mars, which is considered the warrior planet, was in the fire sign of Aries, also the warrior astrological sign. This was an unusually extended period of time. Did anyone feel the extra energy over that 6 month period? Maybe you felt a low level of anxiety? The spiritual path is asking us to look at ourselves, grow, feel our bodies, and be in touch with our emotions.

Presently, Mercury is in retrograde in the sign of Aquarius through February 20<sup>th</sup>. This is the astrological sign that symbolizes our minds thinking outside of the conditioned box. Let your creativity and inner guidance fly. If there are any detours in your life at this time, let them guide you. Look at the Universal signs moving you. Throughout this year the planet Uranus, will be in Taurus and Saturn in Aquarius; they will be squaring themselves which creates friction. They are giving messages to us that changes in our world are emanant. We had the Saturn and Jupiter conjunction on December 20, 2020 in Aquarius, the closeness of these two planets will continue throughout 2021. They are contributing their energetic fuel to the reshaping of our world. We are in a transitional time and being flexible and adaptable will enable all of us to take our steps forward into our new world.

Saturn and Jupiter in Aquarius are very significant right now as we also crossed over to a New Age of Aquarius. Ages last up to 2,100 years. Prior to this we were in the Age of Pisces. The astrological sign of Aquarius, an air sign, is asking our minds to look further into ourselves and connect more with spirit, our neighbors, community, to be more involved, and educated with the day-to-day happenings in the United States; that affect all of us. This is the time of transition, change, and a movement for humanity to progress.

The planet Pluto, which holds the energy of growth and transformation, it has been in the earth sign of Capricorn since 2008. Interesting, that is when we had the financial recession in the U.S. Pluto will remain in that astrological sign until 2023. Capricorn represents the energies of the traditional ways of being; with ourselves, families, and societal norms. Pluto in Capricorn is signaling a time to renovate our ideas and the structures in our world. Pluto likes us to look at what has been hidden. With ourselves it is to address deeper layers of our ego, and where it might have created limitations. The “ego” can be very slippery, not allowing us to really see its projections with our thoughts, and judgments. Globally, Pluto in Capricorn is creating huge shifts in our awareness and structures.

In **2014**, author David Miller wrote: “Earth’s stages of development correspond to its position in relation to the Zodiac. You are leaving the Piscean system and going into the Aquarian system. The entry into a new system means that the energy of the old system disintegrates. But they do not disintegrate without a fight”. It is not about who is President and who isn’t. It is about what is right and

what is wrong. What is in integrity and what is not? Help for the people who are suffering right now, not just for the elite. Please keep your eyes open.

This recent election was the first time, that I can remember, that the people of the United States were very, very passionate, angry, and divided about who was to become our next President. I actually saw people stepping away from others that had opposite ideas regarding who was the best Presidential candidate. I thought America was born on the understanding that our foundation is based around freedom of speech and honoring each other's ideas? But yet I sensed energetic walls going up; division among us. Everyone has a right to have their perception. This also applies to romantic relationships. In arguments, does someone always feel they have to win the disagreement? If so, that is called the wounded ego syndrome. There are many different pieces to the puzzle.

So, do you think that maybe there was a bigger plan to get the people of the United States divided? Because if we were all united, we would be too powerful for those who are trying to keep us suppressed, sick, and weakened. Have they been programming and wanting to manipulate our minds? I think Americans are smarter than that. There are 616,000 people to one politician.

With changes in the air, consequently there is a lot going on behind the scenes with the government, big tech, financial industry, the media, big pharma, and the corporate powerhouses. This is a very thrilling time which is filled with intense energies and yes it can create some anxiety. But everything that is happening is to awaken all of us up to the next level of consciousness. Our souls and this planet are evolving. Let's stretch and utilize our minds in new ways. Our souls signed up to be here at this time of awakening, to be a part of this new passage way, and the new paradigm that is being created for the betterment of mankind. We are to keep our light brightly blazing within our hearts, remain positive, unified, to be focused, and emanate the Love and Light for the Greatest Good of All ! We are birthing a new age and walking through its doorway right now. Please take off those rose-colored glasses. It is the time for all of us to step into Intellectual Maturity.

Remember our souls asked to be here at this time. This time is ripe for you to understand your additional purpose, passions, and gifts to be used for the Greatest Good of All. Listen to your heart and intuition. Some soul's will be leaving their bodies because they did not sign up to be here during this huge shift on Mother Earth. It may not be because of a particular sickness; it is just that their soul agreement is over. The energetic vibrations on earth have changed and are higher in frequency. We are all here for a reason and the new energies that are infusing our minds and bodies will allow us to have more expanded awareness, consciousness, and enable us to utilize other parts of our brains.

I have been on my spiritual path studying for over 40 years. Brian and I have been listening for a year to various YouTube channels with over 12 hosts in the U.S. and other countries. They are all saying the same thing and various hosts are getting information from the inner circle of our government. Some are retired military people, some attorneys, doctors, some just on their mission to get

information out to all people. Many have been dumped and banned from Facebook, Twitter, and their YouTube channels.

So why is information being kept from us? I thought we lived in the land where we had rights of free speech and debates? Isn't every person able to have the right to have their own perception and beliefs? I thought that was our Constitutional rights?

Let's all be ready for these changes in our near future so nothing is jolting. All astrological signs and planetary symbols have been giving us signals about the transitional times we are in. Most likely this year there will be dissolving and rebuilding of systems, there may be initially a little chaos until the new systems are set in place. We may be asked to alter our own traditional ways of being, as our souls are asking us to evolve by broadening our vision, and taking new steps forward. With the Age of Aquarius rolled out, we are all global citizens. We are birthing a New Age of Aquarius; birthing symptoms and feelings may become more noticeable. The Great Awakening is here!

With Love and In Gratitude,
