

Astrology Corner Newsletter

Astrology has been considered one of man's first sciences and everything on Mother Earth and in the galaxy is made up of energy. As I have mentioned in my prior astrological newsletters, planetary movements orbiting through the twelve astrological signs have a direct effect on our mental, emotional, physical, and spiritual energetic bodies. At any particular time, each planet is in a specific astrological sign. Every planet, and astrological sign carry a particular human characteristic. In 2012 Mother Earth and her energetic grid, aura around the earth, shifted to hold a higher vibrational frequency. The frequency of the energies flooding the earth at this time are higher in intensity to effectuate change, to increase awareness, consciousness, and activate more of our DNA. These are extraordinary times. We are in the New Age of Aquarius and we are being asked to step up to a new level.

There is a lot going on astrologically from now through October. We had a **Solar Eclipse** on June 10th and this is when the Sun and the New Moon are both in the same astrological sign; they were in Gemini, an air sign that can work to over stimulate the mind. All eclipses create a portal for additional higher vibrational energies to flood the earth and our bodies. A reset and recalibration is happening; even if you can't see the difference. This is the perfect time to state what you would desire to create in your life and the type of world that you would like to live in.

I stand up for positive changes, freedom, and the Highest Good for All.

The planet **Mercury** went retrograde on May 29th and will be retrograding until June 21st. Since we are in the astrological sign of Gemini, which is an air sign corresponding to the mind, with this retrograding planet be patience with yourselves. If a few daily details slip through the cracks, relax. I misplaced two things the other day and then had a good laugh about it. The Mercury message is to slow the mind down and stay present. The people who have Mercury in a prominent place in their astrological birth charts may be more affected with this cycle than others. But it is also a wonderful time to ask for additional insights on any particular situation or area of your life.

Pluto has been in Capricorn since January 2009 coinciding with the financial recession that the United States had. Capricorn is an earth sign that creates a desire to hold onto traditional, long-established ways. This Capricorn theme also includes governmental structures, corporations, financial and educational institutions. Human themes for Pluto: it works to create an awakening mentally or emotionally, sometimes referred to as a deep transformational shift, or rebirth. The energies of Pluto generate situations to reveal what has been hidden, it transforms, and facilitates the awakening of consciousness to a new level. When planets go retrograde, they put a spotlight on something that needs attention; Pluto is now signaling change. Interesting in 1776 when the Declaration of Independence was signed in the United States, Pluto was also in Capricorn.

Have we detoured in some way from our forefathers' original intentions? Pluto remains in Capricorn until January 21, 2024.

Also, at this time the planet **Saturn is Squaring Uranus** these opposing energies can create some additional agitation in our world; I think we have been seeing this. Saturn carries the restrictive, disciplinarian theme. While the planet Uranus says, "set me free." The position of these two planets will continue to square each other periodically throughout 2021; further contributing to the theme of change. **Saturn and Jupiter** will also be in a retrograde motion in the summer. Planets retrograde spotlight something that needs updating in our lives or the world.

We are in a tremendous transitional time. All of us have been mentally conditioned and programmed to believe a certain way about our lives and the country we live in; truth has been held back for centuries. Our minds have been programmed by our parents, community, societal judgments, the news media, educational books, movies, and more. We have been conditioned to believe that life has to be hard; from many parents past family beliefs. With these higher vibrational energies and planetary alignments, they are to ignite more intuition, increase our insights, help us to develop broader mental perceptions, and increase our unification. We are creating a new paradigm in this new Age of Aquarius. The energy Laws of Attraction express, "what you believe you will create."

Our eyes are supposed to be wide open during this new Age of Aquarius so that we can expand our consciousness; transforming what is outdated. Aquarius is the only humanitarian astrological sign, and it is a good time to be more informed beyond focusing on our own lives.

Have you noticed some inconsistencies with the news media?

Two weeks ago, the Governor of Colorado he instituted a sweepstakes as an incentive for more people to get vaccinated; offering one million dollars to newly vaccinated people in this raffle. He then stated at that time that 90 % of people in the state had been vaccinated. The following week the local news stations shared that 41% of people in Colorado had been vaccinated. What is wrong with this picture? I thought governmental officials were supposed to be honest and in integrity with the words and actions.

Our awakening depends on us reviewing things beyond our personal world. Questions to think about:

Dr Fau_i; (I don't want to write his full name), do you believe he has the highest interest in helping humanity? Well, we all thoughts so. But, last week a number of national news media channels posed some questions around his pure intentions. Newscaster, Tucker Carlson conveyed, Dr. Fau_i funded some experiments in the WuHan Chinese bio laboratory with Bill Gates. Doctor.F. keeps saying that the virus jumped from bats to humans. Really? Just supposedly like AIDS jumped

from monkeys to humans; my brother died of AIDS in 1995 and knew the truth about where it came from.

In 1983 Dr. Fau_i wrote an article about the AIDS virus. The fear in this article sounded just like what he has been creating in 2020 and 2021. Unfortunately, in this day and age money can buy people to do unethical things. There are many individuals who care more about their ego power and having tons of money; the good, the bad, and the ugly..... are about to be exposed.

UFO's; remember the information about Roswell, New Mexico in 1947? Are extraterrestrial beings real? Is the government keeping something from us? Maybe extraterrestrial beings are more benevolent than the human race? We are in 2021, anything is plausible.

Why does the news media keep slanting the United States cyber-attacks are only from Russia? Have other countries also been involved in our affairs? Please do your research and look through YouTube videos from December 2020. I suggest using the search engine: duckduckgo.com on your cell. All research on this search engine can be wiped clean after gathering the information.

What really happened at the Suez Canal? Google may not give you the whole truth. Please research this truth and find out truths...terrible.....some of this can be found on youtube.com.....if they haven't taken it down.

Why does the national new media only give us the covid statistics about those who have died or are still suffering with the virus. Why aren't we getting the statistics of who actually had it, had no complications, and is fine now. Are they trying to keep people in fear?

The Great Awakening is asking us to step out of our old complacent ways, just focusing on our own lives, or only listening to the national news stations on television. Did you know that daily news scripts are prepared for the newscasters? Other people script what they want us to know. There are only 6 huge mega-corporations that own all media in the world. Drama on the news channels brings in higher ratings and consequently more money. Are we being programmed?

The United States was founded on the freedom to question. The Great Awakening involves all of us to individually do our research, be more informed, broaden our perspective; remembering that earth is a schoolhouse for our souls.

Each of us chose to be here at this unique time on earth. Our souls didn't just fall out of the sky and was born through our mothers. Our souls had to have a plan of what it wanted to accomplish while being in a physical body; this had to be approved. There are many souls wishing to come down to earth. Every soul has a soul contract of what we are to accomplish in our lives, to help our souls to evolve. Our souls knew exactly when to be born and at the time of your birth your individual astrological birth chart was created, then this energy was infused into your body (the chart reveals your soul contract). When you have completed your

earth mission, the soul knows when you will exit the body; even if death is from an accident. If your soul has asked to be more aware in this lifetime, then it is your responsibility in continuing to expand your mind. If you feel comfortable with the following, I suggest asking your Higher Self and Soul to be more present in your life; bringing additional wisdom to you.

With the Age of Aquarius and Pluto putting the squeeze on old traditional ways of living, we are being asked to be a proactive participant in creating a better way of life. If they try to lock us down again, will you voice your opinion and stand up for yourself and the businesses in your community that struggled, or closed this year? In the United States, we have many more freedoms and this is the time to be in gratitude. If in your individual birth chart, you have planets in the 11th house, this section of the birth chart holds a theme around community. You may want to become more involved in your community to support a smooth transition; be open to listening for guidance from your heart and soul.

We are living in unprecedented times. In the days ahead there may be more chaos that becomes visible, which reflects that which has been broken; corruption throughout the government, news media, the educational institution, medical, pharmaceutical, and other corporations. Prayers are needed at this time. Let's unify our minds and hold an intention to create a better world that is fair for everyone, not just the elite.

Believing in a Benevolent Higher Power, filled with loving white light is helpful during these times. Please remember that all is in a Divine Plan. As we know, everything happens for a reason and that there are no accidents in our personal lives, or on the world stage. We are all being asked to hold our faith for a better world. I have noticed that some people are repelled by the word "GOD". I guess structured religion probably was pushed down their throats when they were children. Well, this might be the time to rethink that and to understand why your soul has incarnated, to recognize that your soul has a contract to accomplish, and to understand that there are other benevolent loving spiritual energies that we can't see, but are always here helping us.

These unique astrological planetary alignments with their higher energies are flooding the earth and our bodies. We are in a transitional phase for humanity and the planet; a better world is to be created in the Age of Aquarius. All of the retrograde planets are calling for a reset and a reboot; from us individually and collectively. We are being asked to be proactive, become more educated, open our eyes, dispose of some old outdated mental programming, refine ourselves, recalibrate, and integrate these new energies.

It's a new day and a new dawning of the fabulous Age of Aquarius. We are all so fortunate to be here together now. Unification is important and let's expect miracles for a better world!

As George Harrison sang, "Give me love, give me light, give me peace on earth."

With Blessings,
